

# TRAILS

## Explore, Connect and Discover

Heading out from the lodge, your guides can lead you on half-a-dozen trails that wind their way through the surrounding rainforest and connect with the lake. You never know what you might find along the way... A giant ceiba tree, strangler figs, walking palms, Azteca ants, heliconias, bromeliads, and maybe even some forest fauna – if you're lucky.

### 1. SACHA HUAGRA TRAIL

Cross Garzacocho Lake, walk through untouched forest to observe the Giant Kapok Tree (Ceiba Pentandra) and the Strangler Fig Tree (Ficus sp), as well as other plant and animal species that can be seen along the trail; arrive at the lodge for lunch.

Length: 14370 ft / 4380 m

🕒 3-4 hours

### 2. MANDIÑAN TRAIL

Its duration depends on the sightings of animals that you can find along the way. The whole trail is a cake to observe the flora and fauna typical of the rainforest.

Length: 4790 ft / 1460 m

🕒 3-4 hours

### 3. TUCANETA'S TRAIL

This is a short walk around the lodge where you will get a general idea of the tropical rainforest (flora, fauna and microfauna).

Length: 1725.7 ft / 526 m

🕒 2 hours

### 4. CHAWAMANGO TRAIL

Head east at the Mandiñan trailhead, followed by a walk back to Garzacocho lake. Surprises can be found on the way.

Length: 4868.8 ft / 1484 m

🕒 3-4 hours

### 5. COTO TRAIL

This trail is also a loop where you start our walking and come back to the hotel by canoe. Is ideal for observing diverse flora and fauna. With luck we will have mammal and bird sightings close to the lake.

Length: 3674.5 ft / 1120 m

🕒 2 hours

### 6. MATAPALO TRAIL

This is an introductory walk perfect for your arrival day. Here you will have the chance to appreciate the particular Strangler Fig (Ficus sp), Azteca Ants (Azteca Trigona) lots of bright and beautiful heliconia plants and the Rubber Tree (Hevea Brasiliensis).

Length: 961.29 ft / 293 m

🕒 3-4 hours

### 7. CEIBA TRAIL

This is one of our shorter walking trails, but one of the most interesting. The name Ceiba was given for this trail because you can see one of the largest ceibas in this zone. Usually we do this trail at night and at times we can see various snakes, tarantulas and spiders, and a great variety of insects. With luck, we can see nocturnal monkeys or a kinkaju.

Length: 738.19 ft / 225 m

🕒 1-1:30 hours

### 8. CHARAPA TRAIL

Short trip by foot around the edge of Lake Garzacocho. Return by canoe to the lodge.

Length: 1112.2 ft / 339 m

🕒 1-2 hours

### 9. GARZA YACU TRAIL

This is an activity done in canoe where we explore the main canal of the lagoon search for the famous sloth and other primates. With luck we can observe capuchin monkeys, spider monkeys, or howler monkeys. Use of binoculars comes in handy with this type of activity.

Length: 4855.6 ft / 1480 m

🕒 2-2:30 hours

### 10. VECINAL TRAIL

In order to learn a bit more about the life of the Kichua community of the Amazon, this is the best trail to be on. We will travel this trail principally used by the families of the Kichua that they use to move in between each of their houses and the school located in the main area of the community. The interesting this about this trail is that you can also see unique birds that inhabit these intervening areas.

Length: 1345.1 ft / 410 m

🕒 2 hours

### 11. PERDIDOS TRAIL

The journey to and from this walking trail is in canoe, it makes it a much more attractive activity. Once arriving to the trail head we walk through a mature forest and talk about the various ecology and continuously look for elusive fauna of the area. This trail is for those with a higher degree of fitness and is a bit more difficult than others, which is why we do not always have all groups travel this trail.

Length: 3441.6 ft / 1049 m

🕒 2 hours
