Complete relaxing massage

Surrounded by vibrant vegetation, exotic birds, and warm ambiance. As you lie relaxed is both a mental and physical reward all should experience. The complete massage is a full-body massage with scented oils and lotions that will leave you feeling rejuvenated and ready for your next adventure.

Back & Shoulders

The most common areas of stress are the back and shoulders. These areas require special attention, and we're here to help! Enjoy the fascinating view of the Amazonian Forest surrounding the lodge while a therapist skillfully relieves stress from these affected areas and let the gentle warmth and beautiful melody of exotic birds relax your mind.

Legs & calves

After an invigorating day of hiking through the Amazonian forest, it's only fair to reward your legs and calves with an energizing massage. Enjoy your surroundings while being pampered by one of our therapists.

Exfoliation

In addition to our special facial treatments, we also offer an invigorating exfoliation process. Using natural products, this massage will clean your skin, open pores, and help reduce imperfections. Subtle and skilled in their craft, our therapists are ready to listen to your concerns and meet your needs.

Energizing bath with Copal tree leaves

This bath is an excellent way to restore energy and provide an overall feeling of relaxation. Copal leaves provide the body with the powerful energy of the sun, as well as the properties of the earth. This bath eliminates negative energies and generates physical, energetic, and mental health. Copal leaves combined with a special mineral bath reduce blood pressure, increase motivation, boost self-esteem, stimulate concentration, alleviate insomnia, relieve headaches, and create a sense of well-being and happiness.

Amazonian bath

For a complete 60 minutes, relax and enjoy a massage with almond oil and a bath infused with Amazonian herbs. Our therapist will use herbs such as the energizing guayusa leaves native to the Amazon Rainforest, found nowhere else. The leaves are known to offer stimulating properties.

Children's massage

This massage is specially designed for children who would also like to get a spa treatment. It is available for children' ages 4-12. The therapy is gentle and relaxing, promoting better sleep and blood circulation, while also reducing stress and anxiety levels.

Reflexology

Reflexology is an alternative medicine whose principle is to apply pressure to the hands, feet, and ears using various techniques. Our expert therapist is able to identify accumulated stress points, skillfully releasing tension while you're enjoying the enchanting Amazonian view. You'll feel like new and ready for any adventure that comes your way.

Hands & feet

Two of the hardest working areas of the body - hands and feet - require special attention. After a wonderful day of hiking through the Amazonian forest, reward your feet with a massage. You'll surely wake up the next morning ready for the new day. As for your hands, what better way to treat them than with a refreshing massage from one of our professional therapists. Sit back and relax.

Facial

Your face defies the sun, wind, rain, and any other elements that come its way. It's no wonder that our faces require delicate attention. This treatment is designed to pamper, rejuvenate, and cater to the needs of your skin with special organic oils and lotions designed for this therapy.

Natural yucca mask (cassava)

This is a mask made out of yucca. It is easily absorbed and improves the texture and condition of the skin, while smoothing and brightening the complexion. One of the main benefits of yucca is that it acts as a moisturizer and energizer, providing more elasticity.

Silk Bath

This spa session combines a total-body exfoliation segment with honey and brown sugar to rejuvenate your skin with a healthy glow. Afterwards, step into a bath infused with a mixture of sweet spices like cinnamon, rose essence, and ishpingo that comes from a native Ecuadorian tree that is similar to cinnamon.

Hot stone massage

This therapy combines a traditional therapeutic massage with the application of warm stones on the skin at varying temperatures in order to facilitate the flow of vital energy throughout the body. This type of treatment is known to improve the functions of your body while reducing chronic pain, especially in the bones and muscles, which help balance both nervous and circulatory systems.
